

[1] QID: 9

Question : A string comparison fails due to case sensitivity. Modify the program to make the comparison case-insensitive.

```
public class Q8_CaseInsensitive {  
    public static void main(String[] args) {  
        String str = "java";  
        if(str.equalsIgnoreCase("JAVA")){  
            System.out.println("Match");  
        }  
    }  
}
```

```
Program : import java.util.*;  
class CaseInsensitive {  
    public static void main (String args[]){  
        String str = "java";  
        if(str.equalsIgnoreCase("JAVA")) {  
            System.out.println("Match");  
        }  
    }  
}
```

Input : (no input)

Output : Match

[2] QID: 26

Question : A program compares a string with a null value and throws an exception. Modify the

code to safely handle null values.

```
public class Q26_NullSafe {  
    public static void main(String[] args) {  
        String s = null;  
        if("Java".equals(s)){  
            System.out.println("Yes");  
        } else {  
            System.out.println("No");  
        }  
    }  
}
```

Program : import java.util.*;
class NullSafe {

Submitted Answers Report

```
public static void main (String args[]) {  
    String s = null;  
    if("Java".equals(s)) {  
        System.out.println("Yes");  
    } else {  
        System.out.println("No");  
    }  
}
```

Input : (no input)

Output : No

[3] QID: 21

Question : A string replace operation does not change the original string. Identify the issue and correct it.

```
public class Q21_Replace {  
    public static void main(String[] args) {  
        String str = "Java";  
        str = str.replace("a", "o");  
        System.out.println(str);  
    }  
}
```

```
Program : import java.util.*;  
class Replace {  
    public static void main (String args[]) {  
        String str = "Java";  
        str = str.replace("a", "o");  
        System.out.println(str);  
    }  
}
```

Input : (no input)

Output : Jovo

[4] QID: 10

Question : The program contains an error in array declaration and initialization. Identify the syntax issue and correct it.

```
import java.util.Arrays;

public class Q9_ArrayDeclaration {
    public static void main(String[] args) {
        int arr[] = {1,2,3};
        System.out.println(Arrays.toString(arr));
    }
}
```

Submitted Answers Report

```
Program : import java.util.*;

class ArrayDeclaration {
    public static void main (String args[]) {
        int arr[] = {1,2,3};
        System.out.println(Arrays.toString(arr));
    }
}
```

Input : (no input)

Output : [1, 2, 3]
